Fragrance has an emotional dimension. It is able to transport, stir emotion, and bring up memories long lost in the corners of your mind. Fragrance is also a powerful way to present yourself that you just can't find any other way.

At Penn Chemists, we use rare and exotic fragrance oils and blend them with natural soy, coconut and beeswax, ensuring for more compelling and lasting scents that are unfamiliar, yet mysteriously distinct.

Penn Chemists....makers of the finest fragrant remedies and aromatic invigorators since 1898. A trial will prove their merits.
